PHYRO™ Zino

Zinc Solubilising Bacteria Biofertiliser

With STREAC™ Technology at its core, contains a unique formulation of a proprietary and productive Zinc Solubilising Bacterial strain in high concentration having long-term stability.

Benefits of PHYRO™ Zino

Zinc Solubilising Bacteria Biofertiliser that provides bioavailability of zinc to the plants naturally by converting insoluble zinc sulphides, zinc oxide, and zinc carbonate into available Zn.

PHYRO Zino helps improve overall quality of produce & helps in higher yield.

It enhances shape, size, shine and color of fruits.

Provides essential micronutrient zinc to plants by promoting its solubilization, boosting plant health.

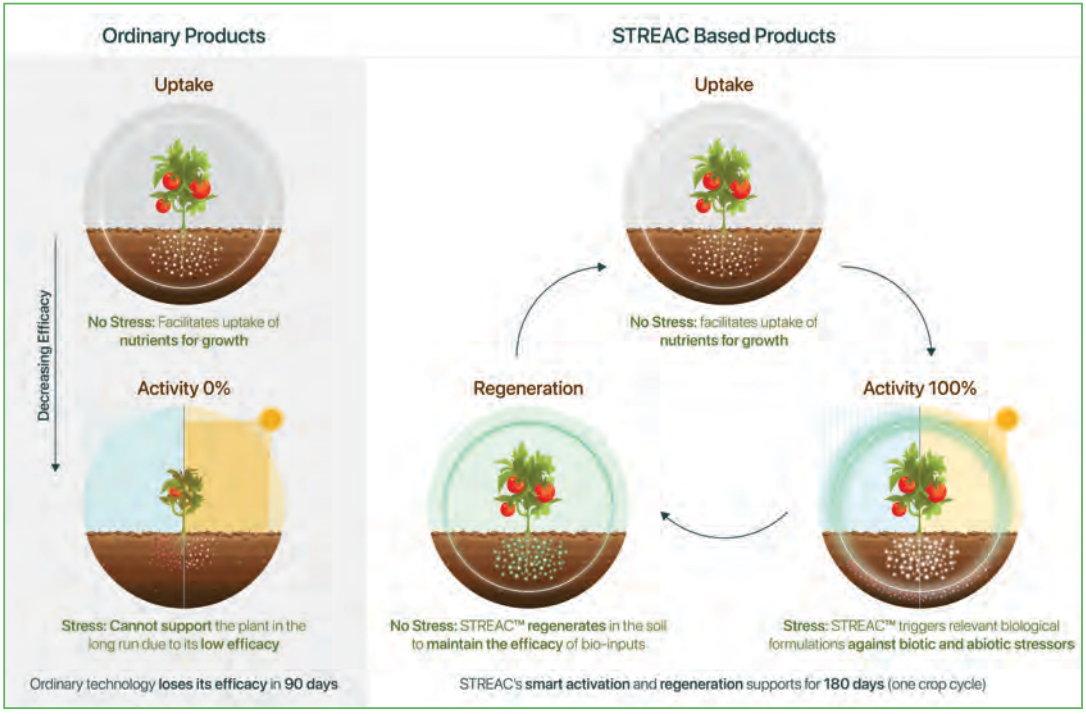

Enhances photosynthesis, resulting in improved plant growth and higher productivity.

STREAC™ TECHNOLOGY

Signal Triggered Regenerative Activation Complex

PHYRO™ Zino is developed using STREAC™ TECHNOLOGY which uses a proprietary complex of activators that induces and stimulates the activity of biological formulation responsive to certain stress signals in the environment.

Restores microbial activity for better soil health and structure.

Improves nutrient use, plant defence and stress tolerance.

Adapts to a diverse range of agro-climatic conditions.

Maximises crop yield even under environmental stress.

Available Pack

Dosage & Application Window

Dosage:

500 g/acre of powder formulation has to be applied in 1 acre crop by the broadcast method. Need to ensure that PHYRO™ Zino reaches the root system of the crop by mixing with 15-20 kg of soil. It can be also mixed and broadcasted with organic and inorganic fertilisers during application with suitable soil moisture conditions.

Application Window:

Vegetative stage of crop

Crops

Paddy, Wheat, Maize, Pulses, Cotton, Oilseeds, Grapes, Oranges, Pomegranates, Vegetables, Spices, Medicinal, and Aromatic Plants
