PHYRO™ Rhodash

POTASH DERIVED FROM RHODOPHYTES - ORGANIC FERTILISER

Potash derived from Rhodophytes is an Organic Fertiliser derived from seaweed extracts. The red seaweeds (Rhodophytes) grow naturally along the tropical seacoasts of southern India. It is 100% red seaweed extract, 100% water soluble, and 100% organic.

Benefits of PHYRO™ Rhodash

Significance

It is a powder formulation containing organic Potash that helps in activation of rapid growth

This highly concentrated organic potash helps improve overall quality of produce & helps in higher yield.

Provides Potash in bioavailable form to plants and helps in better flowering and fruiting of crops.

Low dose formulation which helps plants withstand abiotic stresses effectively.

It is compatible with all other micro/ macro/ nutrients and other biological products

Formulation & SKU

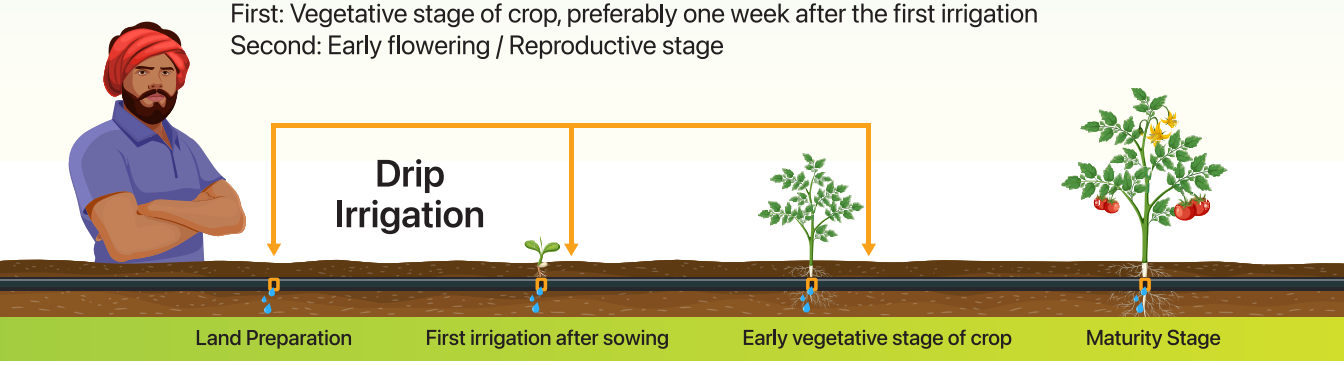

Application & Target Crop

Dosage:

Powder - 150-200gm/acre,
Foliar application- 1 gm/liter of water for field crops and vegetables. 3 gm/liter of water for all perennial and orchard crops.
